

VACUUM LEAK TESTING BOXES

DEPENDABLE PERFORMANCE:

The Vacuum Devices are pre-tested to assure maximum reliability. The designs have been thoroughly field tested for several years in a variety of applications.

RUGGED YET LIGHTWEIGHT:

Our shockproof Vacuum Devices are built with lightweight acrylic which can be heat formed for special applications. The tough rubber gasket is designed to provide a maximum seal. It is designed to meet your needs for Flat and Lap joints as well as inside and outside corner joints.

STANDARD BOX SIZES ARE:

Flat and Lap Joint Boxes:

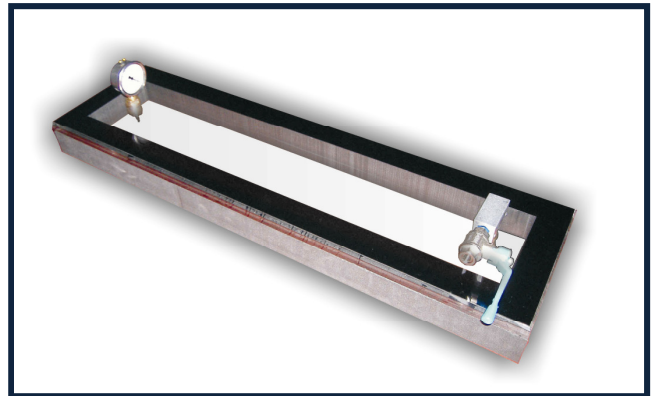

L750mm X W250mm

Corner Boxes:

L450mm X W100mm

CORNER VACUUM DEVICES:

These units are specifically designed for testing the inside corner (where the bottom meets the sidewall at 90 degrees) of storage tanks.

SPECIAL ORDER DEVICES:

Gammatec can source a Vacuum Device to suit your specific needs.
